Updating procedure for eXtreme HD flex Plus

Necessary material:

- USB 2.0 device.
- Last avaible software version.

To proceed with the upgrading, you must have the file with last available version, which you can download from:

http://www.ftemaximal.com

From this website, you will reach a ZIP compressed file which must be decompressed in the root folder of the USB Memory device.

Once you have the update file in the root folder of your memory, please proceed to connect the memory at front connector of the receiver.

Select Menu / Tools / Software Upgrade / USB-STB Upgrade and press OK.

Software Upgrade UNE-SPE Upgrade Backup to USB S/W Upgrade by OTA Channel list Upgrade by OTA Upgrade by network

Select the upgrade mode "maincode" Select the updating file and press "Start" in order to start the updating.

iAttention! Do not power off receiver while updating is running.

When the bar arrives to the 100%, the receiver will reboot

automatically.
