

ENYA 72 firmware update

Necessary material:

- ENYA 72;
- USB 2.0 memory stick;
- Last firmware version for ENYA 72;
- PC;

Previous steps:

- Check the battery status. If the battery level is under 30% we recommended connect the power adaptor while upgrade the meter.
- Download last firmware version available for your field strength meter. You can find at:
<http://www.ftemaximal.com>
- Unzip the file downloaded from the web site. It contains:
 - Folder 784x
inside the folder the next files:
 - Bfirm2_2.bin
 - Fim2_2.bin
 - xcZ2.bit

Updating:

1. Connect the USB memory in your computer
2. Copy the folder 784x with all the files in the root directory of the USB memory
3. Safe extract the usb memory from the computer.
4. Turn on the field strength meter
5. When it is on connect the usb memory
6. Touch HOME> Configuration and Update menu
7. The update process start. Please wait until the update procedure finish.
8. The meter needs around 10 minutes to update.
9. When the meter finish appear in the screen a message to turn off the meter and turn on again
10. Press the power button of the meter to turn off and wait until the meter turn off
11. Turn on again the meter
12. When the meter is on again in the start screen you can see the new version.
